Extract (paragraphs 1 and 2) from the Proceedings of the Government of India in the Home Department (Public), under date Calcutta, the 8th December 1899.

RESOLUTION.

THE Secretary of State for India has brought to the notice of the Government of India that it not infrequently happens that natives of India, students or others, who have proceeded to England, desire to obtain passports to enable them to travel to foreign countries in which the possession of a passport is necessary or desirable, and that difficulty often arises from want of evidence to show that the applicant is a British subject, and therefore entitled to a passport. Appeals for assistance are also frequently addressed to His Lordship by destitute Indians who desire to return to their country and by students who, owing to embarrassed circumstances, are unable to complete their course of education.

2. In order to enable the Secretary of State to deal with such cases satisfactorily, the Governor-General in Council has decided that it is necessary to press upon Indian students and others visiting England the desirability of providing themselves, before their departure from India, with an authoritative certificate of identity, in the form appended to this Resolution, signed by the head of the district (in a Presidency Town, the Commissioner of Police) in the case of residents of British India and by the Political Officer in that of residents of Native States. For a student the certificate should be signed by the head of his last school or college and countersigned by the District Officer (in a Presidency Town, the Commissioner of Police) or Political Officer, as the case may be.

AUSTRALIA—VICTORIA—PORT PHILLIP ENTRANCE.

South channel—Dredging in progress.

No. 293 (third publication).—With reference to Notice to Mariners No. 350, dated 31st October 1903, issued by this Office, the British Admiralty has given further notice (No. 636 of 1904) that, on or about 12th June 1904, the dredger which has hitherto been dredging in the South Channel, port Phillip, to the northward of Portsea, would be transferred to the southern edge of the channel near the Pile lighthouse, the area about to be dredged being marked by two red can buoys.

During the operations the dredger will exhibit a ball by day, and by night two *red* lights placed vertically, 6 feet apart, on the side on which vessels should pass. When the ball or *red* lights are carried amidships, vessels may pass on either side. The dredger will also carry anchor lights forward and aft. A punt will be moored near the dredger, which will also carry an anchor light by night.

Mariners are cautioned to keep clear of the buoys, and when passing the dredger to proceed at as slow a speed as possible and to stop the engines when passing her chains.

Approximate position, lat. 38° 20′ S., long. 144° 51′ E.

Khar Nowarat—Reef in southern approach.

No. 294 (third publication).—The British Admiralty has given notice (No. 642 of 1904) that Mr. T. Hughes, Master of the S.S. *Gulf of Trinidad*, reports that, at 9-50 P.M. on 5th June 1904, his vessel, drawing 23 feet, touched lightly, without sustaining damage, on a reef situated in a position about 6½ miles East from ras Abú Yabis; this position, however, must be considered doubtful, as it was obtained by dead reckoning.

Approximate position, lat. 18° 0¼′ N., long. 38°.38′ E.

A sounding of 4½ fathoms was obtained when the vessel struck, but as it is probable that there is less water over this reef, it has been shown on the Chart as a rock having less than 6 feet over it.

The light is dioptric of the 4th order, and visible from approximately, the bearing of North, through west, to S. 12° W.: it has been placed on the Chart on the rocky point situated 2½ miles S. 12° W. from Patiti point.

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

(1) When not carried in a receptacle forming part of a motor vehicle the petrol shall not be kept, used or transported except in iron or steel vessels so substantially constructed as not to be liable, save by gross negligence or extraordinary accident, to be broken or become defective or insecure.

Every such vessel shall be so constructed and maintained that no leakage, whether of liquid or vapour, can take place therefrom.

(2) Every such vessel, when used for transporting or keeping petrol, shall have attached thereto a metallic or enamelled label in conspicuous characters stating the description of the petrol with the addition of the words "highly inflammable" legibly and indelibly stamped or marked thereon, and with the addition of the name and address of the owner.

A store-house shall have a separate entrance from the open air distinct from that of any dwelling or building in which persons assemble.

(8) The amount of petrol which may be kept by the owner of a motor vehicle, whether or not upon motor vehicles, shall not exceed 60 gallons at any one time.

(10) In the case of all petrol kept or transported for the purpose of, or in connection with, any motor vehicle—

(a) all due precautions shall be taken for the prevention of accidents by fire or explosion, and for the prevention of unauthorised persons from having access to any petrol kept or transported, and to the vessels containing, or intended to contain, or having actually contained the same, and

(b) every person managing or employed on, or in connection with, any motor vehicle shall abstain from every act whatever which tends to cause fire or explosion, and which is not reasonably necessary, and shall prevent any other person from committing any such act.

(11) The store-house shall be liable to inspection by any police officer not lower in rank than Inspector of Police, or by any other officer whom the Local Government may depute for that purpose.

After the word "Mergui" *add* "and from Bombay into the ports of Cochin and Mangalore."

ESTABLISHMENTS.

The 15th September 1904.

No. 719.—Mr. C. E. Buckland, C.I.E., has been permitted to resign His Majesty's Indian Civil Service, with effect from the 29th October 1904.

SANITARY.

PLAGUE.

The 31st August 1904.

No. 1212.—Whereas the Governor-General in Council is satisfied that the North Arcot district of the Madras Presidency is visited by an outbreak of dangerous epidemic disease and that there is a danger of its spread if persons from the Bombay Presidency, Bengal, the Punjab, the Mysore and Hyderabad States, the Central Provinces (including Berar) and Rajputana are permitted to assemble at Tirumalai in the Chendragiri taluq of the North Arcot district on the occasion of the ensuing Brahmotsavam festivals:

In exercise of the power conferred by section 2, sub-section (1), of the Epidemic Diseases Act, 1897 (III of 1897), the Governor-General in Council is pleased to direct that no tickets to travel by railway to the stations of Peddapadu, Mamandura, Renigunta, Pudi, Taduku and Puttur on the Madras Railway and Pakala, Panapakam, Chendragiri, Tirupati West, Tirupati East, Renigunta, Yerpedu, and Kalahasti on the South Indian Railway shall be sold from the 6th to the 20th September (both days inclussive) and from the 4th to the 18th

October 1904 (both days inclusive) within the Bombay Presidency, Bengal, the Punjab, the Mysore and Hyderabad States, the Central Provinces (including Berar) and Rajputana to any person intending, or believed to be intending, to proceed to the Brahmotsavam festival at Tirumalai.

The 12th September 1904.

No. 1309.—By the Home Department Notification No. 1485, dated the 30th September 1903, the Governor-General in Council, under the powers conferred by section 2, sub-section (*1*), of the Epidemic Diseases Act, 1897 (III of 1897), directed that pilgrimage to the Hejaz during the season of 1904 might be permitted to any resident of India, subject to certain precautions, from the ports of Bombay in the Presidency of Bombay and of Chittagong in Bengal.

2. One of the precautions adopted during the pilgrim season of 1904 was the collection of all intending pilgrims at a central observation camp at or near the port of embarkation where they were detained for at least ten days, and where their wearing apparel, bedding, etc., were disinfected, previous to their embarkation. Experience has shown that the cost of this arrangement has been great, and the inconvenience to the pilgrims the subject of much complaint. With the concurrence of His Majesty's Government, it has accordingly been decided that, during the ensuing pilgrim season, pilgrims shall be permitted to proceed to the Hejaz after five, instead of ten, days' observation at the central camp and after satisfactory medical inspection and disinfection. The Haj will accordingly be open during the ensuing pilgrim season to any resident in India, subject to the regulations hereinafter stated.

3. The orders contained in the Home Department Notification No. 1485, dated the 30th September 1903, are hereby cancelled.

4. The Governor-General in Council is pleased to direct—

(1) that no person shall be permitted to embark with the object of making a pilgrimage to Mecca except at the port of Bombay in the presidency of Bombay;

(2) that no person shall be permitted to embark for such purpose at such port unless he has been kept under observation in a place appointed for the purpose at or near the port of embarkation until such time as the medical officer in charge shall be satisfied that all risk of such person conveying the infection of plague has completely abated;

(3) that no passage tickets for the Hejaz shall be sold except at the place appointed for the detention of intending pilgrims under observation.

5. Although they have decided that, subject to the foregoing precautions, the pilgrimage to the Hejaz may be permitted, the Government of India think it necessary to repeat the warning given last year that intending pilgrims will be well advised in deferring the fulfilment of their purpose until another season, in view specially of the stringent quarantine rules imposed by the Turkish Government and of the inconvenience and harassment to which it is likely that they will be subjected on arriving in Arabia.

The 16th September 1904.

No. 1345.—The following notifications of the Government of India in the Home Department are hereby rescinded, namely:—Notifications No. 2021, dated the 1st November 1901 (as amended by Notification No. 1887, dated the 7th August 1902), and No. 2333, dated the 31st October 1902, prohibiting, under section 2, sub-section (*1*), of the Epidemic Diseases Act, 1897 (III of 1897), the bringing, taking, sending or consigning of soiled linen, used bedding, rags and waste paper from the Benares, Ballia, Jaunpur or Cawnpore district of the United Provinces, or of soiled linen, used bedding and rags from the Allahabad district of those provinces, into or through any other part of India to which the provisions of the said Act extend or have been applied.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF AUGUST 1904.

THE monsoon fully maintained its strength during the first three weeks of August, but showed signs of weakening in the fourth week. Up to that time there was no serious break in the rains even during the short period of formation of the usual storms at the head of the bay. Of these latter there were, excluding the one which was passing inland on the 1st, two which might properly by described as cyclonic storms, and there was likewise a third shallow depression which, however, influenced the weather to only a slight extent. The first of these affected the head of the bay and the province from the 11th to the 15th, while the second, which formed at the head of the bay on the morning of the 19th, finally passed beyond the limits of the reporting area on the 23rd of the month.

Pressure at the beginning of the month was in slight to moderate excess over the province, the excess being greatest in the west. Pressure continued to rise on the 2nd day, but on the 3rd a fall set in from the east which brought the pressure to a point below normal on the 5th. This deficiency merely lasted for 24 hours, however, and excess pressure once more obtained till the 8th. The sharp fall which commenced on that date in the north of the province led to the establishment of considerable defect over the province and the head of the bay, and being succeeded by a rapid rise in Bihar on the 11th finally brought about the formation of a small area of low pressure to the south of Saugor Island on the latter date. Though the weather was accordingly characterised by considerable fluctuations of pressure, the general distribution remained very uniform, a strong monsoon current as judged by the steepness of the pressure obtaining over the bay.

Rainfall which in the first few days of the month, after the passage westward of the storm, had been light and somewhat scattered gradually increased, though the south-western parts of the province owing to the prevalence of south-west winds were comparatively free from rain. The greatest precipitation, however, during this period was caused by a local depression in the north-west of the province, which gave rise to very heavy rainfall in North Bihar between the 9th and 11th. Temperature during this period oscillated slightly, but never varied much from the normal in any part of the province.

The depression which first appeared on the 11th of the month developed during the next two days into a storm of considerable severity, and then crossing the coast on the morning of the 14th August passed rapidly through Chota Nagpur into the United Provinces. Though a comparatively severe storm as judged by the depth at the centre and the pressure gradient at the time it was crossing the coast, it gave strangely little rainfall.

Temperature had fallen sharply in Bihar during the local precipitation on the 10th. As at the same time the temperature over the remainder of the province was rising during the period of development of the storm at the head of the bay, the variation of the mean temperature was somewhat irregular. On the morning of the 14th, however, the departure from the normal was again everywhere inconsiderable except in Orissa, where mean temperature was in defect.

With the departure of the storm a change now took place in the distribution, and on the 16th and 17th westerly winds were blowing over the greater part of Bengal. Pressure, which had risen sharply in the wake of the storm, was on the 16th slightly above normal over the province except in the extreme north. Rainfall diminished considerably, and from the 15th to the 16th the province was practically rainless. Under these conditions temperature began to rise, and on the 17th was above the normal over the whole province.

On the 18th a change set in, the altered distribution favouring the gradual re-establishment of southerly winds over Bengal, and leaving to the formation of a small depression at the head of the bay on the 19th. The first indication of disturbed weather was afforded by the appearance of a circumscribed area of low pressure in the north of the province on the 18th, but this speedily gave way to a depression with a regular cyclonic circulation of winds to the south of Saugor Island on the succeeding day. The storm developed slowly during the 19th and 20th, and on the afternoon of the 21st crossed the mouth of the Hooghly into West Bengal. During the next two days, it passed rapidly through West Bengal and Chota Nagpur into the United Provinces. This storm not only during its passage across the land but also during its period of development gave well-distributed though generally not more than moderate rain to the whole province. Pressure during this period followed a somewhat unusual course. A rapid fall set in on the 17th, and this was followed by a rise setting in from the north on the 18th and extending over the whole province on the 19th, the rise in the west exceeding, however, that in the south. On the 20th pressure began again to fall in the south and the fall increased rapidly and extended to the whole province on the 21st. With the passage inland of the storm the usual rise of pressure took place behind it, and on the 24th pressure was once more in slight excess throughout.

Though temperature decreased generally from east to west with the passage of the storm it only fell for a very short period below the normal in the western districts, while in the east it was always in slight excess, so that the rise which took place on the 24th brought the whole Province once more under the influence of high temperature.

From the 24th to the 27th the monsoon current showed signs of weakening, and rainfall fell off considerably. Pressure which on the 24th showed a small general excess oscillated slightly during these days, with the result that on the 27th the departure from the normal was nowhere general; pressure on that day being slightly above normal in Chota

Nagpur and Bihar and slightly below over the rest of Bengal. Temperature likewise varied to a moderate extent, but generally remained high, so that it was still above normal on the 27th except in the extreme north. On the 27th a shallow depression formed at the head of the bay and passed inland on the 29th without having developed into a storm. It did not influence the weather appreciably, and while it crossed the head of the bay and the Province rainfall diminished still further, weather from the 27th to the 29th being for the most part fine with occasional showers and high temperature.

Pressure changes were again very slight during this period, and on the morning of the 29th the departure from the normal was everywhere small, there being slight deficiency except in the extreme south and the extreme north of the province.

During the last days of the month, the monsoon current over the bay increased once more in strength, and though the distribution over the province was somewhat unfavourable, rainfall again became fairly general though light. This was no doubt due to the sudden fall of pressure which took place between the 29th and 30th and which brought about a considerable deficiency on the 30th, a deficiency which, notwithstanding a partial recovery on the 31st, still maintained itself at the end of the month. These changes were accompanied by a fall of temperature, and at the end of the month mean temperature was above the average in South-West Bengal, Chota Nagpur and Orissa and below elsewhere.

Summary of weather.—A strong monsoon prevailed during the month, and it was only during the last eight days that any real sign of retreat of the current was manifest. The storms which during this month serve as a check to any temporary weakening of the monsoon were of about the usual frequency, but unfortunately the last depression had not sufficient energy to cause a fresh advance of monsoon winds over the province, and there is consequently a slight though very slight deficiency in the rainfall of the month.

Summary of pressure.—Pressure was below normal during the greater part of the month, chiefly owing to the great deficiency caused by the two storms during the middle period of the month. Though mean pressure is therefore below the average over the whole province, the departure from the normal is for the most part very slight.

Summary of temperature.—Temperature on the other hand was above the average for the greater part of the month, except in Bihar and South Orissa, the defect in the former being due to the copious rainfall which it received during the month. The excess is nowhere large and is shown almost equally in day and night temperatures. The excess in maximum temperature was greatest in Calcutta, where it amounted to nearly 2°, and the greatest defect in maximum temperatures was at Gaya, where it exceeded 5°. The greatest excess in night temperature amounting to over 2° is shown at Rampur Boalia.

Summary of rainfall.—Though the rainfall was somewhat light at the beginning of the month, it may be regarded as having been fairly continuous and well distributed during the first three weeks, the only general weakening which occurred in this period being from the 15th to the 17th. From the 23rd, however, till the 30th there was a marked diminution in the rainfall, which, however, once more began to increase on the last two days of the month.

The only divisions which shew excess are Bihar and Chota Nagpur, and the former has largely to thank the heavy precipitation caused by a local depression on the 9th and 10th of the month for its excess of 13 per cent. It should be noted that except in South-West Bengal the number of rainy days was greater than usual, so that to the comparative lightness of the rain must in the main be attributed the deficiency for the month. This comparative lightness was especially noticeable in the rainfall accompanying the storms which passed across the province and which seldom caused more than a very moderate precipitation. The greatest deficiency is shown in East and South-West Bengal, the percentage in the former being about 20 per cent. and in the latter about 25 per cent. In North Bengal and Orissa the deficiency was insignificant.

The comparison of the actual rainfall in the various large divisions of the Province with the normal is most accurately and conveniently shown in the form of a percentage. The figures representing the rainfall for the month, calculated in this way, are included in the table below under the heading of August. This table really gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division, the first eight columns giving the actual average rainfall in each division in each month, expressed as a percentage of the normal, while the ninth column gives the total rainfall for the first eight months expressed as a percentage of the normal rainfall for that period:—

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

NOTIFICATION.

No. 2791J.D.—The 24th September 1904.—In supersession of all existing rules on the subject, the following rules, which have been framed by the Chief Presidency Magistrate under section 21 (I) of the Criminal Procedure Code, 1898 (Act V of 1898), for the Courts of the Presidency Magistrates, Calcutta, and sanctioned by the Lieutenant-Governor, are published for general information:—

Calcutta.

PRESIDENCY MAGISTRATES' COURTS.

Rules framed under section 21, Criminal Procedure Code.

1. The Chief Presidency Magistrate will ordinarily sit from 10 A.M. till 4-30 P.M., the other salaried Presidency Magistrates from 10-30 A.M. till 5 P.M., and the Presidency Magistrates other than the Chief Presidency Magistrate or salaried Presidency Magistrates from midday till 5 P.M., on all days that are not gazetted holidays. On the last Saturday of each month one salaried Presidency Magistrate and a Bench of Presidency Magistrates only will sit. Special arrangements will be made for sittings during the Puja and Christmas holidays.

2. The first salaried Presidency Magistrate will ordinarily take cognizance direct of all petty police cases (night charges) and of all cases under the Merchant Shipping Act. The second salaried Presidency Magistrate will ordinarily take cognizance direct of all cases sent up by the Society for the Prevention of Cruelty to Animals. With these exceptions, Presidency Magistrates will try only such cases as may be referred to them by the Chief Presidency Magistrate, or by his orders.

3. In the Chief Presidency Magistrate's Court business will be conducted as far as possible in the following order:—

I.—Applications for process will be received.

II.—Unheard cases, both new and adjourned, that have been fixed for the day will be distributed for trial.

III.—Postponed applications will be taken up.

IV.—Part-heard cases in the file, and new cases kept by the Chief Presidency Magistrate in his own file will be dealt with.

4. All applications for process, including applications to summon a person to give evidence or to produce any document or other thing, should ordinarily be made in writing on

foolscap properly stamped when necessary. Applications for process should contain the names and addresses of the parties, and the names of witnesses, and a brief description of the subject-matter of the complaint. Applications to summon persons to give evidence or to produce any document or other thing should show, if possible, the father's name, as well as the address of each witness, unless he be a European British subject.

5. Presidency Magistrates other than the Chief Presidency Magistrate or salaried Presidency Magistrates will sit in accordance with the roster drawn up by the Chief Presidency Magistrate. Special Benches may, however, be convened by him for any day or hour.

6. Benches will ordinarily consist of three Presidency Magistrates other than the Chief Presidency Magistrate or salaried Presidency Magistrates, one of whom will be appointed Chairman by the Chief Presidency Magistrate. Should one or more of the members be absent, the Chief Presidency Magistrate may, in his discretion, either arrange for substitutes, or, if two members still remain, direct the work to proceed without the absent member.

7. The Chairman shall ordinarily record the evidence and judgment (in cases where a record of evidence and judgment is necessary) with his own hand, but such duty may with his consent be performed by any of his colleagues, or the evidence may be taken down by the Clerk of the Court at the dictation of the Chairman.

8. Every member of a Bench shall have a voice in the determination of all points arising in cases before them and in the finding and sentence, and the decision of the majority shall prevail. In a Bench composed of two members the opinion of the Chairman shall prevail on all points except the finding; in the event of a disagreement as to the finding the case shall be referred back to the Chief Presidency Magistrate.

9. To obviate as far as possible adjourned sittings of Presidency Magistrates other than the Chief Presidency Magistrate or salaried Presidency Magistrates, only such cases as can probably be disposed of in one hearing will ordinarily be transferred to them. Any unheard cases that cannot be taken up on the day of transfer for want of time or other reason shall be sent back to the Chief Presidency Magistrate as early as possible.

10. Where it is necessary to adjourn a part-heard case the adjournments shall be as far as possible *de die in diem*.

11. It is expected of Presidency Magistrates other than the Chief Presidency Magistrate or salaried Presidency Magistrates, whether empowered to sit singly or not, that when requested by the Chief Presidency Magistrate or by an officer of police not below the rank of Superintendent, they will go without delay to any place within a reasonable distance from their residences, or, if they be in Court, within a reasonable distance from the Court, in order to record the statements of persons reported to be in danger of death and whose evidence is regarded by the officer making the requisition as essential to the conviction of a prisoner charged with the commission of a criminal offence.

UNIVERSITY ENTRANCE EXAMINATION, 1905.

TEST-EXAMINATION OF PRIVATE STUDENTS.

1. A student who does not appear from any school, or who has been transferred since the 1st September next preceding the examination, without the consent of the Inspector, to the school from which he appears, will be treated as a private student.

2. All private students are required to appear at the test-examination of a zilla school. No private student will be admitted to the test-examination unless accompanied, for the purpose of identification, by some person known to the Head Master.

3. The first day of the test-examination in all zilla schools in the Bhagalpur Division will be the 12th December 1904.

4. Each private student will have to pay a fee of Rs. 2 for permission to appear at the test-examination to the Head of the institution at which he appears. The balance of fees, after payment of expenses (stationery, &c.), will go as remuneration to the examiners.

5. Candidates for the test-examination should apply to this office not later than the 9th November 1904. They should forward the certificates granted to them under the transfer rules by the Head Master of the school in which they last read. In the case of a candidate who had failed at a previous Entrance examination and did not join a school afterwards, the Registrar's receipt, in original, will be accepted in lieu of the transfer certificate.

6. A student who had failed to pass the annual examination for promotion to the first class at the end of session 1903-1904 and then left the school cannot under any circumstances be allowed to appear at the Entrance examination that will be held on the 6th March 1905 and following days.

7. Each candidate should submit with his application a statement showing—

(1) Age.

(2) Residence.

(3) Father's name.

(4) Second language, besides English.

(5) Whether he appeared at any previous Entrance examination.

8. *Boná-fide* teachers employed in any of the recognised schools in the Bhagalpur Division may be admitted to the test-examination on payment of the prescribed fee, provided they can produce certificates of service and character from their employers, or from the Deputy Inspector of the district concerned.

9. The forms of application for permission to appear at the Entrance examination will be signed by the Head Master of the zilla school at which the candidates have undergone the test, and will be forwarded by him to the Inspector for countersignature.

10. Applications and fees for admission to the Entrance examination must be forwarded to the Registrar of the Calcutta University by the private candidates themselves, so as to reach his office on or before the 24th January 1905.

F.A. AND B.A. EXAMINATIONS, 1905.

1. Deputy Inspectors of Schools, Sub-Inspectors of Schools, and *boná-fide* teachers of recognised English schools in the Bhagalpur Division of two years' standing, *i.e.*, who have served as such for full two academical sessions, or for six months in the case of those who were admitted to a former examination of the same class, will be admitted to the above examinations. These latter must have served for six months prior to the submission of their applications to the Inspector for countersignature. School-masters should produce certificates of character and length of service (with dates) from the Managers of the schools in which they are employed. Their applications must reach this office not later than the 9th January 1905.

2. Candidates for the B.A. examination must forward with the applications their F.A. certificates, and those for the F.A. examination their Entrance certificates.

3. Candidates should read carefully the certificate which this office will have to sign, and must be careful to supply all information and documents required, without which the Inspector must decline to sign it.

4. The F.A. and B.A. examinations in 1905 will be held on the 22nd March 1905 and following days.

5. Applications and fees for admission to the above examinations must be forwarded to the Registrar, Calcutta University, by the candidates themselves so as to reach his office on or before the 7th February 1905.

REPORT ON THE ROAD AND PUBLIC WORKS CESS OPERATIONS OF THE LOWER PROVINCES FOR THE YEAR 1903-1904.

No. 4744R.P.—The 23rd September 1904.—The following extracts from the Report of the Board of Revenue on the Road and Public Works Cess Operations in the Lower Provinces for the year 1903-1904 are published for general information.

L. P. SHIRRES,

Secretary to the Govt. of Bengal.

No. 6939A., dated Calcutta, the 20th August 1904.

From—H. LEMESURIER, Esq., C.I.E., Offg. Secretary to the Board of Revenue, L. P.

To—The Secretary to the Government of Bengal, Financial Department.

Rate, land revenue demand, and gross rental.

3. Both cesses were levied at the maximum rate of one anna in the rupee in the 43 districts in which the Cess Act, IX (B.C.) of 1880, is in force. The current demand of land revenue of those districts was Rs. 3,99,83,113 and the valuation or gross rental amounted to Rs. 17,84,24,533

Demands, collections, balances, and remissions.

4. The table below exhibits the demands, collections, balances, and remissions during 1903-1904 as compared with the two preceding years:—

Year.	Demand.			Collections.	Percentage of total collections on current demand.	Balance.	Percentage of the balance on the total demand.	Remissions.
	Current.	Arrear.	Total.					
	Rs.	Rs.	Rs.	Rs.		Rs.		Rs.
1901-1902	93,26,543	16,75,523	1,10,02,066	93,1[illegible],825	99·8	16,84,618	15·3	66,878
1902-1903	95,04,201	16,70,927	1,12,[illegible]5,128	96,34,504	100·4	16,39,104	14·5	67,751
1903-1904	9[illegible],41,734	16,29,013	1,14,70,747	97,68,1[illegible]2	99·2	17,12,989	14·9	78,454

The increase of Rs. 2,47,533 in the current demand, as compared with that in 1902-1903, was mainly the result of revaluations in the several districts, of which Gaya and Shahabad contributed Rs. 29,504 and Rs. 15,100 respectively, Cuttack, (in which the revaluation took effect from the commencement of the year under report), nearly Rs. 43,000, and Hazaribagh Rs. 10,049. With the increase in the demand, there was an increase in collections by Rs. 1,33,688, but the provincial percentage slightly decreased by 1·2. The arrear demand decreased by Rs. 41,914. Remissions were chiefly granted in the districts of Burdwan, Khulna, Gaya, Shahabad, Purnea, Balasore, Ranchi, Manbhum, and Singhbhum, and were due to the usual causes.

5. Districts are grouped in two classes—(*i*) those in which the collections attained the prescribed standard of 100 per cent. or more on the current demand, and (*ii*) those in which the collections were short of that standard.

The marginally-noted districts fell under class (*i*), and in their case no explanation is called for. The results in Singhbhum, Palamau, Puri, Bankura, and Manbhum were satisfactory, they having attained percentages above 105. Of the 19 districts in which the percentages did not reach the standard, explanations with regard to Cuttack (99·6), Nadia (99·2), Chittagong (99·3), Midnapore (99·0), Saran (98·9), Jalpaiguri (98·4), and Darjeeling (98·1), may also be dispensed with as they attained percentages in excess of 98.

Working of the certificate procedure.

7. The total number of certificates filed for the realization of cess arrears was 95,037, against 77,523 during the previous year. The increase, which was common to nearly all the Divisions, was most marked in those of Burdwan and Patna, while there was a decrease in the Rajshahi and Orissa Divisions. The increase in the districts of Burdwan, Bankura, and Hooghly is attributed to the issue of a large number of certificates for the realization of demands below Rs. 5 which were not of a recurring nature, and which therefore did not come within the general prohibition of the Board's Circular Order No. 16 of January 1902. But the numerous certificates for small sums in Nadia were a direct departure from that prohibition, and the Commissioner of the Presidency Division has drawn the Collector's attention to the subject. The increase in the 24-Parganas and Khulna, Rajshahi, Rangpur, Purnea, and Balasore was the result of the recent revaluations in those districts. In Dacca, Mymensingh, Noakhali, Chittagang, Monghyr, and Manbhum, it is ascribed to the issue of certificates for the recovery of a large number of petty arrears which were likely to be barred by limitation; in Patna, to certain errors in showing the actual number of certificates; in Gaya, to the increased number of defaults, and in Saran, to the issue of certificates in contravention of the Board's circular order referred to, which has since been stopped. Energetic realization of the arrear demand in Puri resulted in an increase in the number of certificates issued. In Hazaribagh, the issue of certificates on the holders of rent-free lands for arrears exceeding one rupee swelled the figures. The Board in approving of this arrangement, as an exceptional case, instructed the Deputy Commissioner to watch carefully the effect of the relaxation of the

general rule, taking precautions against the harassment of judgment-debtors by delays, and the undue accumulation of costs. The cases disposed of exceeded the institution in the Rajshahi, Dacca, Chittagong, Patna, and Orissa Divisions.

Objections against certificates.

8. The total number of objections filed and disposed of was 6,525 and 6,359, against 8,210 and 7,808 respectively during the previous year. The number of cases cancelled on objection were 660, as compared with 756 in the preceding year, the withdrawal of certificates being due to the usual causes, such as the death and desertion of judgment-debtors, the exemption of lands lying within municipal limits, double assessments, the non-registration of the names of the holders of rent-free lands, errors in the Land Registration registers, and wrong entries in the ledgers owing to the imperfect information supplied by the parties in *chalans*. The number of cases in which reductions were made in the amount certified declined from 1,032 to 432, as compared with the preceding year.

Stage of procedure at which demands were satisfied.

9. The mere issue of notices was sufficient to secure payment in 25,738 cases, as against 36,346 in the previous year, while in 33,369 cases, against 72,182, payments were made on the issue of notices for the sale of the defaulters' movable properties, and in 18,950 cases, against 23,194, on the issue of notices for the sale of immovable properties. In 2,732 cases recourse was had to actual sales before the demands were satisfied, out of which 1,158 were set aside under sections 20 and 21 of the Public Demands Recovery Act I (B. C.) of 1895, as amended by Act I (B. C.) of 1899.

Gross rental.

16. The Road Cess was first assessed in 40 districts, the gross rental or valuation of which was Rs. 13,11,68,432. Subsequently the districts of Khulna and Palamau were created, and the Cess Act, IX (B.C.) of 1880, was extended to them and to parganas Dhalbhum and Porahat in Singhbhum. In the Sonthal Parganas into which the Act is being gradually introduced, the valuation of some recently resettled estates was completed, and the Board have called on the local officers to propose a date from which the new cess demand should be levied. The gross rental rose to Rs. 17,84,20,533 during the year under report, showing an increase of Rs. 4,72,52,101 over the original valuation, and of Rs. 34,46,710 over that of the preceding year. The increase as compared with the past year was due to valuations and revaluations.

Merits of officers.

18. The following Deputy Collectors who were in charge of the Cess Department for the whole year have been favorably mentioned by Commissioners:—

Babu Nobin Chunder Sen (No. 1), Tippera.
" Sures Chandra Chatterji, Rajshahi.
" Sarat Chandra Sen Gupta, Palamau.

In the districts mentioned against each of the above mentioned officers, the collections were above the standard of 100 per cent. on the current demand fixed by Government.

The following names of Revaluation Officers deserving of notice have also been taken from the Commissioners' reports:—

Maulvi Syed Mujibur Rahman, Malda.
Babu Gopi Krishna Lall, Shahabad.
" Mohendra Nath Kundu, Rajshahi.
" Sudarsan Das, Noakhali.
" Phanindra Nath Mukherji, Faridpur.
" Har Sahay Lal, Gaya.

Under orders contained in the Resolution of this Government, dated the 9th October 1901, which was published in the *Calcutta Gazette* of the 16th October 1901, an examination was instituted which has since been held yearly at the Sibpur, Patna, Dacca, and Cuttack Colleges, for the purpose of testing the knowledge in surveying of pleaders desiring to qualify themselves for execution of commissions under section 392 of the Code of Civil Procedure. Since the issue of that Resolution, examinations have been held annually for three successive years with the results noted below:—

Cuttack ...	4	3	4	4	19	13

2. It has been reported by the authorities of the Education Department who arrange for these examinations that a large number of candidates who present themselves for examination have very little knowledge of practical survey, and that under the present conditions of the examination incompetent persons may be declared to have passed. The orders for conducting the examination, which are contained in the Resolution above cited, have accordingly been carefully reconsidered by the Lieutenant-Governor, in consultation with the Hon'ble Judges of the High Court, the Legal Remembrancer, and the Director of Public Instruction, Bengal; and in modification of those orders the following revised rules are prescribed:—

(1) When a commission issued by a Civil Court under section 392 of the Code of Civil Procedure is of such a nature as to require that the person executing it should have some knowledge of surveying, it should ordinarily be issued only to a person who holds a certificate of proficiency in surveying: provided that a District Judge is not precluded from issuing a commission of the kind to salaried amins in districts in which they still exist.

(2) Certificates of proficiency in surveying will be granted to pleaders who pass yearly examinations to be held for this purpose in February at the Sibpur, Patna, Dacca, and Cuttack Colleges. Only pleaders practising in the Courts of the Province will be eligible for examination.

(3) The examination will test the candidates' knowledge in chain and compass surveying, plane tabling, levelling, plotting, the use of the theodolite, and the permanent and temporary adjustment of instruments: The pass marks will be 50 per cent. in each test in the field and 40 per cent. on the paper.

(4) Applications for admission to appear at the examination should in the first place be submitted to the District Judge in whose Court or in Courts subordinate to whom the pleader ordinarily practises. The District Judge will require evidence from all applicants that they have undergone some training in practical surveying. He will not countersign the application of a candidate who fails to satisfy him on this point; nor will such a candidate be permitted to appear at the examination.

(5) Candidates should forward their applications, after countersignature by the Judge, together with a fee of Rs. 30, to the Director of Public Instruction, Bengal, on or before the 15th of December, and should state the centre at which they desire to be examined.

(6) Certificates granted at these examinations will be accepted by District Judges for the purpose stated in Rule 1, but will not be available for any other purpose.

ORDER.—Ordered, that a copy of the Resolution be forwarded to the Director of Public Instruction, Bengal, to all District Judges, and the Judicial Commissioner of Chota Nagpur, for information and guidance.

Ordered, also, that a copy be published in the *Calcutta Gazette*.

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.
